SOCIAL CHANGE AND ECONOMIC LIFE INITIATIVE

Series Editor: Duncan Gallie

TRADE UNIONISM IN RECESSION

THE SOCIAL CHANGE AND ECONOMIC LIFE
INITIATIVE

This volume is part of a series arising from the Social Change and Economic Life Initiative—a major interdisciplinary programme of research funded by the Economic and Social Research Council. The programme focused on the impact of the dramatic economic restructuring of the 1980s on employers' labour force strategies, workers' experiences of employment and unemployment, and the changing dynamics of household relations.

ALSO PUBLISHED IN THIS SERIES

Social Change and the Experience of Unemployment
Edited by Duncan Gallie, Catherine Marsh, and Carolyn Vogler

Skill and Occupational Change
Edited by Roger Penn, Michael Rose, and Jill Rubery

Employer Strategy and the Labour Market
Edited by Jill Rubery and Frank Wilkinson

*Gender Segregation and Social Change:
Men and Women in Changing Labour Markets*
Edited by Alison MacEwen Scott

The Social and Political Economy of the Household
Edited by Michael Anderson, Frank Bechhofer, and
Jonathan Gershuny

FOREWORD

This volume forms part of a series of publications arising from the Social Change and Economic Life Initiative—a programme of research initiated and supported by the Economic and Social Research Council. Fieldwork for the Work Histories/Attitudes survey, and the Household and Community survey, was undertaken by Public Attitude Surveys (High Wycombe) Ltd. The authors and editors wish to thank the many colleagues and others who commented on earlier drafts or versions of the chapters, several of which appeared in the SCEL Working Papers series.

LIST OF FIGURES

-
- | | | |
|-----|---|-----|
| 5.1 | Percentage of employed members of two age groups who were trade union members: 30–4 year olds, and 50–60 year olds, all SCEL I localities | 182 |
| 6.1 | The union mark-up and the union–non-union wage gap | 220 |
| 6.2 | Decomposition of union and non-union wages | 221 |

LIST OF TABLES

2.1	Policy towards trade union membership	34
2.2	Reasons trade union influence should be maintained	36
2.3	Percentage encouraging trade union membership	39
2.4	Logistic regression on employer favourability to unionism	40
2.5(a)	Technical change and policies towards union membership	42
2.5(b)	Policies towards union membership by proportion affected by new technology	42
2.6	Rationalization of work and managerial policies	43
2.7	Managerial policies to unions and labour market position	44
2.8	Managerial policies to unions and customer pressure	46
2.9	Areas of growth of union influence	48
2.10(a)	How 1980s Employment Acts have affected union behaviour	49
2.10(b)	Reasons unions little affected by 1980s Employment Acts	49
2.11	Change in union influence over pay	51
2.12	Change in union influence over work organization	52
2.13	Logistic regression on change in union influence	53
2.14(a)	Change in union influence over pay by technical change and work rationalization	54
2.14(b)	Change in union influence over work organization (increase) by technical change and work rationalization	55
2.15	Change in union influence by area	56
2.16	Prevailing view on ways to get work done	58
2.17	Reasons for better employee relations	59
2.18	Employer favourability to unionism by employee involvement schemes	60

List of Tables

xi

2.19(a)	Establishments and employee involvement scheme	61
2.19(b)	Percentage with employee involvement schemes by technical change	61
2.20	Logistic regression on whether employer has an employee involvement scheme	62
3.1	Main features of case-study workplaces	73
4.1	Trade union membership and commitment	142
4.2	Reasons for initial membership of current members, by social class (%)	144
4.3	Most important current reason for being a trade union member at present (%)	145
4.4	Change in importance of trade union membership in last five years (%)	146
4.5	Trade union membership and commitment, by social class (%)	148
4.6	The effect of establishment size and trade union membership	152
4.7	Percentage of employees unionized, by industrial sector	153
4.8	Percentage of employees unionized by class and industry/ownership sector	154
4.9	The effect of ownership sector	156
4.10	Trade union membership, by social class, sex, and employment status	158
4.11	Trade union membership, employment status, and work commitment	160
4.12	Membership and favourability to trade unions	161
4.13	The determinants of favourability to trade unions	164
4.14	Trade union membership, labour market area, establishment size, and ownership sector	165
4.15	Area and trade union membership: beta coefficient with successive controls	166
4.16	Parameter estimates for the odds of union membership of employees (logistical regression)	167
4.17(a)	Percentage of former trade unionists, by labour market	169
4.17(b)	Percentage of former trade unionists, by activity status	169
4.18	Most important reason for no longer being a trade union member	170

4.19	Comparison of employment situation of current and former trade union members	172
5.1	Four models of union growth and decline in the UK	177
5.2	Membership of trade unions of employed persons in 1966, 1976, and 1986, for respondents aged 20-39 years in each period (%)	183
5.3	Changes in the status of survey respondents: 1966, 1976, and 1986, for respondents aged 20-39 years in each year	184
5.4	Percentage of trade union membership among 30-60 year olds, by localities and gender, 1976-1986	186
5.5	Pooled time-series-cross-section model of trade union membership: simple business-cycle specification	191
5.6	Pooled time-series-cross-section model of trade union membership: individual-characteristics specification	194
5.7	Pooled time-series-cross-section model of trade union membership: job-characteristics specification	195
5.8	Pooled time-series-cross-section model of trade union membership: simple business-cycle specification, with individual characteristics	197
5.9	Pooled time-series-cross-section model of trade union membership: the combined effects	198-9
5.10	Probability of joining a trade union: OLS equivalents of maximum likelihood estimates of logit model	202-4
5.11	Probability of leaving a trade union: OLS equivalents of maximum likelihood estimates of logit model	208-10
5.12	Predicted probabilities of joining a trade union, given certain transitions in any particular year	211
5.13	Predicted probabilities of leaving a trade union, given certain transitions in any particular year	213
6.1	Average basic hourly wage	224
6.2	Union-non-union wage gap using ordinary least squares	225

6.3	Union-non-union wage gap using ordinary least squares with various alternative specifications	226
6.4	Estimates of the union-non-union wage gap allowing for endogeneity of union membership (percentage mark-up)	227
6.5	Variables used in the analysis	233-5
6.6	Ordinary least squares regressions for male wages (dependent variable is log of basic hourly wage)	236
6.7	Ordinary least squares regressions for female wages (dependent variable is log of basic hourly wage)	237
6.8	Equations to estimate the union-non-union wage gap for manual males	238-9
6.9	Equations to estimate the union-non-union wage gap for non-manual males	239-40
6.10	Equations to estimate the union-non-union wage gap for females in full-time employment	241-2
6.11	Equations to estimate the union-non-union wage gap for females in part-time employment	242-3
7.1	Confirmed redundancies in Rochdale local authority district: 1980-1987	256-7
7.2	Employment patterns in Rochdale, 1981-1984 (selected sectors)	258
7.3	Gender and hours of work in Rochdale, 1981-1984	258
7.4	Comparison of the numbers of employees in the thirty-two establishments with the 1984 Census of Employment	259
7.5	Trade union membership: data from the thirty-two establishment study in Rochdale	260-3
7.6	Trade union structure in Rochdale during the 1980s	270-2
7.7	Trade unions and social change in Rochdale	278-80
A.1	The Work Attitudes/Histories Survey 1986: achieved sample	320
A.2	The Household and Community Survey 1987: achieved sample by characteristics at time of Work Attitudes/Histories Survey	324
A.3	The Baseline Employer Survey	326
