POLITICAL ECONOMY

WITH

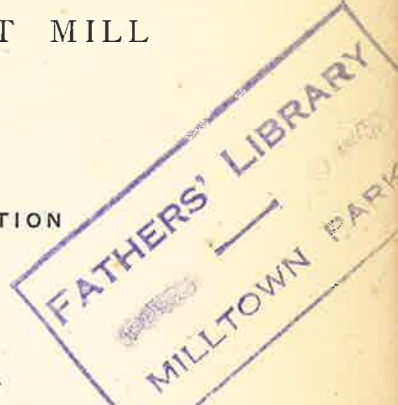

SOME OF THEIR APPLICATIONS TO SOCIAL PHILOSOPHY

BY

JOHN STUART MILL

PEOPLE'S EDITION

LONDON
LONGMANS, GREEN AND CO.
AND NEW YORK: 15 EAST 16th STREET
1891

CONTENTS.

PRELIMINARY REMARKS 1

BOOK I.
PRODUCTION.

CHAPTER I. *Of the Requisites of Production.*

§ 1. Requisites of production, what 15
2. The function of labour defined 16
3. Does nature contribute more to the efficacy of labour in some occupations than in others? 17
4. Some natural agents limited, others practically unlimited, in quantity 11

CHAPTER II. *Of Labour as an Agent of Production.*

§ 1. Labour employed either directly about the thing produced, or in operations preparatory to its production 19
2. Labour employed in producing subsistence for subsequent labour 20
3. — in producing materials 21
4. — or implements 22
5. — in the protection of labour 23
6. — in the transport and distribution of the produce 24
7. Labour which relates to human beings 25
8. Labour of invention and discovery 26
9. Labour agricultural, manufacturing, and commercial 27

CHAPTER III. *Of Unproductive Labour.*

§ 1. Labour does not produce objects, but utilities 28
2. — which are of three kinds 29
3. Productive labour is that which produces utilities fixed and embodied in material objects 30
4. All other labour, however useful, is classed as unproductive 31
5. Productive and Unproductive Consumption 32
6. Labour for the supply of Productive Consumption, and labour for the supply of Unproductive Consumption 33

CHAPTER IV. *Of Capital.*

§ 1. Capital is wealth appropriated to reproductive employment 34
2. More capital devoted to production than actually employed in it 36
3. Examination of some cases illustrative of the idea of capital 37

CHAPTER V. <i>Fundamental Propositions respecting Capital.</i>	
§ 1. Industry is limited by Capital	PAGE 39
2. — but does not always come up to that limit	41
3. Increase of capital gives increased employment to labour, without assignable bounds	41
4. Capital is the result of saving	43
5. All capital is consumed	44
6. Capital is kept up, not by preservation, but by perpetual reproduction	46
7. Why countries recover rapidly from a state of devastation	47
8. Effects of defraying government expenditure by loans	47
9. Demand for commodities is not demand for labour	49
10. Fallacy respecting Taxation	55
CHAPTER VI. <i>Of Circulating and Fixed Capital.</i>	
§ 1. Fixed and Circulating Capital, what	57
2. Increase of fixed capital, when at the expense of circulating, might be detrimental to the labourers	58
3. — but this seldom if ever occurs	61
CHAPTER VII. <i>On what depends the degree of Productiveness of Productive Agents.</i>	
§ 1. Land, labour, and capital, are of different productiveness at different times and places	63
2. Causes of superior productiveness. Natural advantages	63
3. — greater energy of labour	65
4. — superior skill and knowledge	66
5. — superiority of intelligence and trustworthiness in the community generally	67
6. — superior security	70
CHAPTER VIII. <i>Of Co-operation, or the Combination of Labour.</i>	
§ 1. Combination of Labour a principal cause of superior productiveness	71
2. Effects of separation of employments analysed	73
3. Combination of labour between town and country	74
4. The higher degrees of the division of labour	75
5. Analysis of its advantages	77
6. Limitations of the division of labour	80
CHAPTER IX. <i>Of Production on a Large, and Production on a Small Scale.</i>	
§ 1. Advantages of the large system of production in manufactures	81
2. Advantages and disadvantages of the joint-stock principle	84
3. Conditions necessary for the large system of production	87
4. Large and small farming compared	89
CHAPTER X. <i>Of the Law of the Increase of Labour.</i>	
§ 1. The law of the increase of production depends on those of three elements, Labour, Capital, and Land	96
2. The Law of Population	97
3. By what checks the increase of population is practically limited	98

CHAPTER XI. *Of the Law of the Increase of Capital.*

1. Means and motives to saving, on what dependent	PAGE 100
2. Causes of diversity in the effective strength of the desire of accumulation	102
3. Examples of deficiency in the strength of this desire	103
4. Exemplification of its excess	107

CHAPTER XII. *Of the Law of the Increase of Production from Land.*

1. The limited quantity and limited productiveness of land, the real limits to production	108
2. The law of production from the soil, a law of diminishing return in proportion to the increased application of labour and capital	109
3. Antagonist principle to the law of diminishing return; the progress of improvements in production	111

CHAPTER XIII. *Consequences of the foregoing Laws.*

1. Remedies when the limit to production is the weakness of the principle of accumulation	117
2. Necessity of restraining population not confined to a state of inequality of property	117
3. — nor superseded by free trade in food	119
4. — nor in general by emigration	121

BOOK II.

DISTRIBUTION.

CHAPTER I. *Of Property.*

§ 1. Introductory remarks	127
2. Statement of the question	124
3. Examination of Communism	125
4. — of St. Simonism and Fourierism	130

CHAPTER II. *The same subject continued.*

§ 1. The institution of property implies freedom of acquisition by contract	133
2. — the validity of prescription	134
3. — the power of bequest, but not the right of inheritance. Question of inheritance examined	135
4. Should the right of bequest be limited, and how?	138
5. Grounds of property in land, different from those of property in moveables	140
6. — only valid on certain conditions, which are not always realized. The limitations considered	141
7. Rights of property in abuses	144

CHAPTER III. Of the Classes among whom the Produce is distributed.

§ 1. The produce sometimes shared among three classes 145
 2. — sometimes belongs undividedly to one 145
 3. — sometimes divided between two 146

CHAPTER IV. Of Competition and Custom.

§ 1. Competition not the sole regulator of the division of the produce . 147
 2. Influence of custom on rents, and on the tenure of land 148
 3. Influence of custom on prices 149

CHAPTER V. Of Slavery.

§ 1. Slavery considered in relation to the slaves 151
 2. — in relation to production 152
 3. Emancipation considered in relation to the interest of the slave-owners 153

CHAPTER VI. Of Peasant Proprietors.

§ 1. Difference between English and Continental opinions respecting peasant properties 155
 2. Evidence respecting peasant properties in Switzerland 156
 3. — in Norway 159
 4. — in Germany 161
 5. — in Belgium 164
 6. — in the Channel Islands 167
 7. — in France 168

CHAPTER VII. Continuation of the same subject.

§ 1. Influence of peasant properties in stimulating industry 171
 2. — in training intelligence 172
 3. — in promoting forethought and self-control 173
 4. Their effect on population 174
 5. — on the subdivision of land 180

CHAPTER VIII. Of Metayers.

§ 1. Nature of the metayer system, and its varieties 183
 2. Its advantages and inconveniences 184
 3. Evidence concerning its effects in different countries 185
 4. Is its abolition desirable? 191

CHAPTER IX. Of Cottiers.

§ 1. Nature and operation of cottier tenure 193
 2. In an overpeopled country its necessary consequence is nominal rents 195
 3. — which are inconsistent with industry, frugality, or restraint on population 196
 4. Ryot tenancy of India 197

CHAPTER X. Means of abolishing Cottier Tenancy.

§ 1. Irish cottiers should be converted into peasant proprietors 199
 2. Present state of this question 204

CHAPTER XI. Of Wages.

§ 1. Wages depend on the demand and supply of labour—in other words, on population and capital 207
 2. Examination of some popular opinions respecting wages 208
 3. Certain rare circumstances excepted, high wages imply restraints on population 211
 4. — which are in some cases legal 213
 5. — in others the effect of particular customs 214
 6. Due restriction of population the only safeguard of a labouring class 216

CHAPTER XII. Of Popular Remedies for Low Wages.

§ 1. A legal or customary minimum of wages, with a guarantee of employment 218
 2. — would require as a condition, legal measures for repression of population 219
 3. Allowances in aid of wages 221
 4. The Allotment System 223

CHAPTER XIII. The Remedies for Low Wages further considered.

§ 1. Pernicious direction of public opinion on the subject of population 225
 2. Grounds for expecting improvement 227
 3. Twofold means of elevating the habits of the labouring people: by education 230
 4. — and by large measures of immediate relief, through foreign and home colonization 231

CHAPTER XIV. Of the Differences of Wages in different Employments.

§ 1. Differences of wages arising from different degrees of attractiveness in different employments 233
 2. Differences arising from natural monopolies 236
 3. Effect on wages of a class of subsidized competitors 238
 4. — of the competition of persons with independent means of support 240
 5. Wages of women, why lower than those of men 242
 6. Differences of wages arising from restrictive laws, and from combinations 243
 7. Cases in which wages are fixed by custom 244

CHAPTER XV. Of Profits.

§ 1. Profits resolvable into three parts; interest, insurance, and wages of superintendence 245
 2. The minimum of profits; and the variations to which it is liable . 246

§ 3. Differences of profits arising from the nature of the particular employment	PAGE
4. General tendency of profits to an equality	247
5. Profits do not depend on prices, nor on purchase and sale	248
6. The advances of the capitalist consist ultimately in wages of labour	251
7. The rate of profit depends on the Cost of Labour	252

CHAPTER XVI. *Of Rent.*

§ 1. Rent the effect of a natural monopoly	255
2. No land can pay rent except land of such quality or situation, as exists in less quantity than the demand	255
3. The rent of land consists of the excess of its return above the return to the worst land in cultivation	257
4. — or to the capital employed in the least advantageous circumstances	258
5. Is payment for capital sunk in the soil, rent, or profit?	259
6. Rent does not enter into the cost of production of agricultural produce	262

BOOK III.

EXCHANGE.

CHAPTER I. *Of Value.*

§ 1. Preliminary remarks	264
2. Definitions of Value in Use, Exchange Value, and Price	265
3. What is meant by general purchasing power	265
4. Value a relative term. A general rise or fall of Values a contradiction	266
5. The laws of Value, how modified in their application to retail transactions	267

CHAPTER II. *Of Demand and Supply, in their relation to Value.*

§ 1. Two conditions of Value: Utility, and Difficulty of Attainment	268
2. Three kinds of Difficulty of Attainment	269
3. Commodities which are absolutely limited in quantity	270
4. Law of their value, the Equation of Demand and Supply	271
5. Miscellaneous cases falling under this law	272

CHAPTER III. *Of Cost of Production, in its relation to Value.*

§ 1. Commodities which are susceptible of indefinite multiplication without increase of cost. Law of their Value, Cost of Production	274
2. — operating through potential, but not actual, alterations of supply	275

CHAPTER IV. *Ultimate Analysis of Cost of Production.*

§ 1. Principal element in Cost of Production—Quantity of Labour	277
2. Wages not an element in Cost of Production	278

§ 3. — except in so far as they vary from employment to employment	PAGE
4. Profits an element in Cost of Production, in so far as they vary from employment to employment	279
5. — or are spread over unequal lengths of time	280
6. Occasional elements in Cost of Production: taxes, and scarcity value of materials	281

CHAPTER V. *Of Rent, in its Relation to Value.*

§ 1. Commodities which are susceptible of indefinite multiplication, but not without increase of cost. Law of their Value, Cost of Production in the most unfavourable existing circumstances	285
2. Such commodities, when produced in circumstances more favourable, yield a rent equal to the difference of cost	286
3. Rent of mines and fisheries, and ground-rent of buildings	288
4. Cases of extra profit analogous to rent	289

CHAPTER VI. *Summary of the Theory of Value.*

§ 1. The theory of Value recapitulated in a series of propositions	290
2. How modified by the case of labourers cultivating for subsistence	292
3. — by the case of slave labour	293

CHAPTER VII. *Of Money.*

§ 1. Purposes of a Circulating Medium	293
2. Gold and Silver, why fitted for those purposes	294
3. Money a mere contrivance for facilitating exchanges, which does not affect the laws of Value	296

CHAPTER VIII. *Of the Value of Money, as dependent on Demand and Supply.*

§ 1. Value of Money, an ambiguous expression	297
2. The value of money depends, ceteris paribus, on its quantity	298
3. — together with the rapidity of circulation	300
4. Explanations and limitations of this principle	301

CHAPTER IX. *Of the Value of Money, as dependent on Cost of Production.*

§ 1. The value of money, in a state of freedom, conforms to the value of the bullion contained in it	303
2. — which is determined by the cost of production	304
3. This law, how related to the principle laid down in the preceding chapter	306

CHAPTER X. *Of a Double Standard, and Subsidiary Coins.*

§ 1. Objections to a double standard	307
2. The use of the two metals as money, how obtained without making both of them legal tender	308

CHAPTER XI. *Of Credit, as a Substitute for Money.*

	PAGE
§ 1. Credit not a creation but a transfer of the means of production	309
2. In what manner it assists production	310
3. Function of credit in economizing the use of money	311
4. Bills of exchange	312
5. Promissory notes	314
6. Deposits and cheques	315

CHAPTER XII. *Influence of Credit on Prices.*

§ 1. The influence of bank notes, bills, and cheques, on price, a part of the influence of Credit	316
2. Credit a purchasing power similar to money	317
3. Effects of great extensions and contractions of credit. Phenomena of a commercial crisis analysed	318
4. Bills a more powerful instrument for acting on prices than book credits, and bank notes than bills	320
5. — the distinction of little practical importance	322
6. Cheques an instrument for acting on prices, equally powerful with bank notes	324
7. Are bank notes money?	326
8. No generic distinction between bank notes and other forms of credit	327

CHAPTER XIII. *Of an Inconvertible Paper Currency.*

§ 1. The value of an inconvertible paper, depending on its quantity, is a matter of arbitrary regulation	328
2. If regulated by the price of bullion, an inconvertible currency might be safe, but not expedient	330
3. Examination of the doctrine that an inconvertible currency is safe if representing actual property	331
4. — of the doctrine that an increase of the currency promotes industry	332
5. Depreciation of currency a tax on the community, and a fraud on creditors	334
6. Examination of some pleas for committing this fraud	334

CHAPTER XIV. *Of Excess of Supply.*

§ 1. Can there be an oversupply of commodities generally?	336
2. The supply of commodities in general, cannot exceed the power of purchase	337
3. — never does exceed the inclination to consume	338
4. Origin and explanation of the notion of general oversupply	339

CHAPTER XV. *Of a Measure of Value.*

§ 1. A Measure of Exchange Value, in what sense possible	341
2. A Measure of Cost of Production	342

CHAPTER XVI. *Of some Peculiar Cases of Value.*

§ 1. Values of commodities which have a joint cost of production	345
2. Values of the different kinds of agricultural produce	344

CHAPTER XVII. *Of International Trade.*

	PAGE
§ 1. Cost of production not the regulator of international values	347
2. Interchange of commodities between distant places, determined by differences not in their absolute, but in their comparative, cost of production	348
3. The direct benefits of commerce consist in increased efficiency of the productive powers of the world	349
4. — not in a vent for exports, nor in the gains of merchants	350
5. Indirect benefits of commerce, economical and moral; still greater than the direct	351

CHAPTER XVIII. *Of International Values.*

§ 1. The values of imported commodities depend on the terms of international interchange	352
2. — which depend on the Equation of International Demand	353
3. Influence of cost of carriage on international values	356
4. The law of values which holds between two countries, and two commodities, holds of any greater number	356
5. Effect of improvements in production, on international values	358
6. The preceding theory not complete	360
7. International values depend not solely on the quantities demanded, but also on the means of production available in each country for the supply of foreign markets	361
8. The practical result little affected by this additional element	363
9. The cost to a country of its imports, on what circumstances dependent	365

CHAPTER XIX. *Of Money, considered as an Imported Commodity.*

§ 1. Money imported in two modes; as a commodity, and as a medium of exchange	367
2. As a commodity, it obeys the same laws of value as other imported commodities	367
3. Its value does not depend exclusively on its cost of production at the mines	369

CHAPTER XX. *Of the Foreign Exchanges.*

§ 1. Purposes for which money passes from country to country as a medium of exchange	370
2. Mode of adjusting international payments through the exchanges	370
3. Distinction between variations in the exchanges which are self-adjusting, and those which can only be rectified through prices	373

CHAPTER XXI. *Of the Distribution of the Precious Metals through the Commercial World.*

§ 1. The substitution of money for barter makes no difference in exports and imports, nor in the law of international values	374
2. The preceding theorem further illustrated	376

	PAGE
§ 3. The precious metals, as money, are of the same value, and distribute themselves according to the same law, with the precious metals as a commodity	379
4. International payments of a non-commercial character	379

CHAPTER XXII. *Influence of Currency on the Exchanges and on Foreign Trade.*

§ 1. Variations in the exchange, which originate in the currency	380
2. Effect of a sudden increase of a metallic currency, or of the sudden creation of bank notes or other substitutes for money	381
3. Effect of the increase of an inconvertible paper currency. Real and nominal exchange	384

CHAPTER XXIII. *Of the Rate of Interest.*

§ 1. The rate of interest depends on the demand and supply of loans	385
2. Circumstances which determine the permanent demand and supply of loans	386
3. Circumstances which determine the fluctuations	388
4. The rate of interest, how far, and in what sense, connected with the value of money	390
5. The rate of interest determines the price of land and of securities	393

CHAPTER XXIV. *Of the Regulation of a Convertible Paper Currency.*

§ 1. Two contrary theories respecting the influence of bank issues	394
2. Examination of each	395
3. Reasons for thinking that the Currency Act of 1844 produces a part of the beneficial effect intended by it	397
4. — but produces mischiefs more than equivalent	400
5. Should the issue of bank notes be confined to a single establishment?	408
6. Should the holders of notes be protected in any peculiar manner against failure of payment?	409

CHAPTER XXV. *Of the Competition of different Countries in the same Market.*

§ 1. Causes which enable one country to undersell another	410
2. Low wages one of those causes	411
3. — when peculiar to certain branches of industry	412
4. — but not when common to all	414
5. Some anomalous cases of trading communities examined	414

CHAPTER XXVI. *Of Distribution, as affected by Exchange.*

§ 1. Exchange and Money make no difference in the law of wages	416
2. — in the law of rent	417
3. — nor in the law of profits	418

BOOK IV.

INFLUENCE OF THE PROGRESS OF SOCIETY ON PRODUCTION AND DISTRIBUTION.

CHAPTER I. *General Characteristics of a Progressive State of Wealth.*

	PAGE
§ 1. Introductory Remarks	421
2. Tendency of the progress of society towards increased command over the powers of nature; increased security; and increased capacity of co-operation	421

CHAPTER II. *Influence of the Progress of Industry and Population on Values and Prices.*

§ 1. Tendency to a decline of the value and cost of production of all commodities	424
2. — except the products of agriculture and mining, which have a tendency to rise	425
3. — that tendency from time to time counteracted by improvements in production	426
4. Effect of the progress of society in moderating fluctuations of value	427
5. Examination of the influence of speculators, and in particular of corn dealers	428

CHAPTER III. *Influence of the Progress of Industry and Population on Rents, Profits, and Wages.*

§ 1. First case; population increasing, capital stationary	430
2. Second case; capital increasing, population stationary	432
3. Third case; population and capital increasing equally, the arts of production stationary	433
4. Fourth case; the arts of production progressive, capital and population stationary	433
5. Fifth case; all the three elements progressive	437

CHAPTER IV. *Of the Tendency of Profits to a Minimum.*

§ 1. Doctrine of Adam Smith on the competition of capital	439
2. Doctrine of Mr. Wakefield respecting the field of employment	440
3. What determines the minimum rate of profit	441
4. In opulent countries, profits habitually near to the minimum	443
5. — prevented from reaching it by commercial revulsions	444
6. — by improvements in production	445
7. — by the importation of cheap necessaries and instruments	446
8. — by the emigration of capital	447

CHAPTER V. <i>Consequences of the Tendency of Profits to a Minimum.</i>	
§ 1. Abstraction of capital not necessarily a national loss	448
2. In opulent countries, the extension of machinery not detrimental but beneficial to labourers	450
CHAPTER VI. <i>Of the Stationary State.</i>	
§ 1. Stationary state of wealth and population, dreaded and deprecated by writers	452
2. — but not in itself undesirable	453
CHAPTER VII. <i>On the Probable Futurity of the Labouring Classes.</i>	
§ 1. The theory of dependence and protection no longer applicable to the condition of modern society	455
2. The future well-being of the labouring classes principally dependent on their own mental cultivation	458
3. Probable effects of improved intelligence in causing a better adjustment of population—Would be promoted by the social independence of women	459
4. Tendency of society towards the disuse of the relation of hiring and service	459
5. Examples of the association of labourers with capitalists	461
6. — of the association of labourers among themselves	465
7. Competition not pernicious, but useful and indispensable	476

BOOK V.

ON THE INFLUENCE OF GOVERNMENT.

CHAPTER I. <i>Of the Functions of Government in general.</i>	
§ 1. Necessary and optional functions of government distinguished	479
2. Multifarious character of the necessary functions of government	480
3. Division of the subject	482
CHAPTER II. <i>Of the General Principles of Taxation.</i>	
§ 1. Four fundamental rules of taxation	483
2. Grounds of the principle of Equality of Taxation	484
3. Should the same percentage be levied on all amounts of income?	485
4. Should the same percentage be levied on perpetual and on terminable incomes?	488
5. The increase of the rent of land from natural causes a fit subject of peculiar taxation	492
6. A land tax, in some cases, not taxation, but a rent-charge in favour of the public	493
7. Taxes falling on capital, not necessarily objectionable	494

CHAPTER III. *Of Direct Taxes.*

	PAGE
§ 1. Direct taxes either on income or on expenditure	495
2. Taxes on rent	496
3. — on profits	496
4. — on wages	498
5. An Income Tax	499
6. A House Tax	501

CHAPTER IV. *Of Taxes on Commodities.*

§ 1. A Tax on all Commodities would fall on profits	504
2. Taxes on particular commodities fall on the consumer	505
3. Peculiar effects of taxes on necessaries	506
4. — how modified by the tendency of profits to a minimum	507
5. Effects of discriminating duties	510
6. Effects produced on international exchange by duties on exports and on imports	512

CHAPTER V. *Of some other Taxes.*

§ 1. Taxes on contracts	517
2. Taxes on communication	518
3. Law Taxes	519
4. Modes of taxation for local purposes	520

CHAPTER VI. *Comparison between Direct and Indirect Taxation.*

§ 1. Arguments for and against direct taxation	521
2. What forms of indirect taxation most eligible	523
3. Practical rules for indirect taxation	524

CHAPTER VII. *Of a National Debt.*

§ 1. Is it desirable to defray extraordinary public expenses by loans?	526
2. Not desirable to redeem a national debt by a general contribution	528
3. In what cases desirable to maintain a surplus revenue for the redemption of debt	529

CHAPTER VIII. *Of the Ordinary Functions of Government, considered as to their Economical Effects.*

§ 1. Effects of imperfect security of person and property	531
2. Effects of over-taxation	532
3. Effects of imperfection in the system of the laws, and in the administration of justice	533

CHAPTER IX. *The same subject continued.*

§ 1. Laws of Inheritance	536
2. Law and Custom of Primogeniture	537
3. Entails	539

	PAGE
§ 4. Law of compulsory equal division of inheritances	54
5. Laws of Partnership	54
6. Partnerships with limited liability. Chartered Companies	54
7. Partnerships in <i>commandite</i>	54
8. Laws relating to insolvency	54

CHAPTER X. *Of Interferences of Government grounded on
Erroneous Theories.*

§ 1. Doctrine of Protection to Native Industry	55
2. Usury Laws	55
3. Attempts to regulate the prices of commodities	56
4. Monopolies	56
5. Laws against Combination of Workmen	56
6. Restraints on opinion or on its publication	56

CHAPTER XI. *Of the Grounds and Limits of the Laissez-faire
or Non-Interference Principle.*

§ 1. Governmental intervention distinguished into authoritative and unauthoritative	567
2. Objections to government intervention—the compulsory character of the intervention itself, or of the levy of funds to support it	568
3. — increase of the power and influence of government	570
4. — increase of the occupations and responsibilities of government	570
5. — superior efficiency of private agency, owing to stronger interest in the work	571
6. — importance of cultivating habits of collective action in the people	572
7. <i>Laissez-faire</i> the general rule	573
8. — but liable to large exceptions. Cases in which the consumer is an incompetent judge of the commodity. Education	575
9. Case of persons exercising power over others. Protection of chil- dren and young persons; of the lower animals. Case of women not analogous	577
10. Case of contracts in perpetuity	579
11. Cases of delegated management	579
12. Cases in which public intervention may be necessary to give effect to the wishes of the persons interested. Examples: hours of labour; disposal of colonial lands	581
13. Case of acts done for the benefit of others than the persons con- cerned. Poor Laws	583
14. Colonization	585
5. — other miscellaneous examples	589
6. Government intervention may be necessary in default of private agency, in cases where private agency would be more suitable	590
